

Introducing CryoFuze 7, our all-new line of thermal pastes. Available in both 2g and 4g amounts, CryoFuze 7 utilizes nanoparticles to allow for excellent thermal conductivity and heat transfer on all processing components. It's balanced viscosity and electrically insulated composition provides the ultimate bond with effortless application and clean up. Noncorrosive and oxidation resistant properties prevent solidification and leave metal contact surfaces unharmed. CryoFuze 7 also has a versatile range of temperature performance, maintaining stability from -50°C up to 250°C . All of this is contained in an eco-friendly, environment-first package.
