Powerful airflow up to 2230 m³/h, Remote control for your convenience, Slim 14cm width to help you save space, Optional aroma diffuser for relaxing air, Cool airflow around the room with 60° oscillation

CX5535/11

Highlights

Large Airflow

This rotating fan features a high and wide air outlet combined with 60° oscillation, delivering cooling comfort across larger spaces. Whether you're in a bedroom, living room, or office, this floor-standing fan ensures even air distribution for a consistently cool environment—perfect for those hot summer days.

Aromatherapy add-on

Turn your upright fan into a personal wellness station. With the optional aroma diffuser, you can add essential oils for a fresh, calming atmosphere. Ideal for bedrooms and living areas, this fan creates a multisensory experience by combining airflow with scent, helping you relax and unwind.

Quiet Sleep mode

Enjoy a peaceful night's sleep with Quiet Sleep mode. This quiet tower fan gradually reduces its speed over 30 minutes, maintaining airflow while minimising noise. Perfect as a quiet cooling fan for bedrooms, it provides comfort without disturbing your rest, making it a great addition to your nighttime routine.

Refreshing Natural wind

Bring the refreshing feeling of an outdoor breeze into your room with the Natural Breeze mode and enjoy a more natural and invigorating indoor experience.

A mode for every mood

Fully customise your fan's performance to your needs, whether you prefer a gentle breeze or a more powerful blast of air, with its three speed settings. With three versatile modes (Normal, Natural Wind, Silent Sleep), you can choose the perfect mode to suit your preferences and fully customise your comfort.

Timer function

Set the timer for anywhere between 1 and 7 hours, allowing you to enjoy a cool breeze for the perfect amount of time while also conserving energy and reducing costs. Our 40-W tower fan is energy efficient, using less energy than a traditional light bulb.

Rotation function

Optimum oscillation that ensures that air is circulated throughout your room. No more hot spots or stuffy air, just a comfortable and cool experience.

Slim Design

A minimalistic, eye-catching design that blends seamlessly with any decor. The slim, space-saving design makes it perfect for use in bedrooms, offices, kitchens and other areas where space is at a premium. Place your tower fan in the corner or against a wall without it getting in the way of things.

Remote availability

The feather touch control panel and ergonomic remote controller make our tower fan a pleasure to use and have in any room.

Powerful airflow up to 2230 m³/h, Remote control for your convenience, Slim 14cm width to help you save space, Optional aroma diffuser for relaxing air, Cool airflow around the room with 60° oscillation
