## H2 FLOW

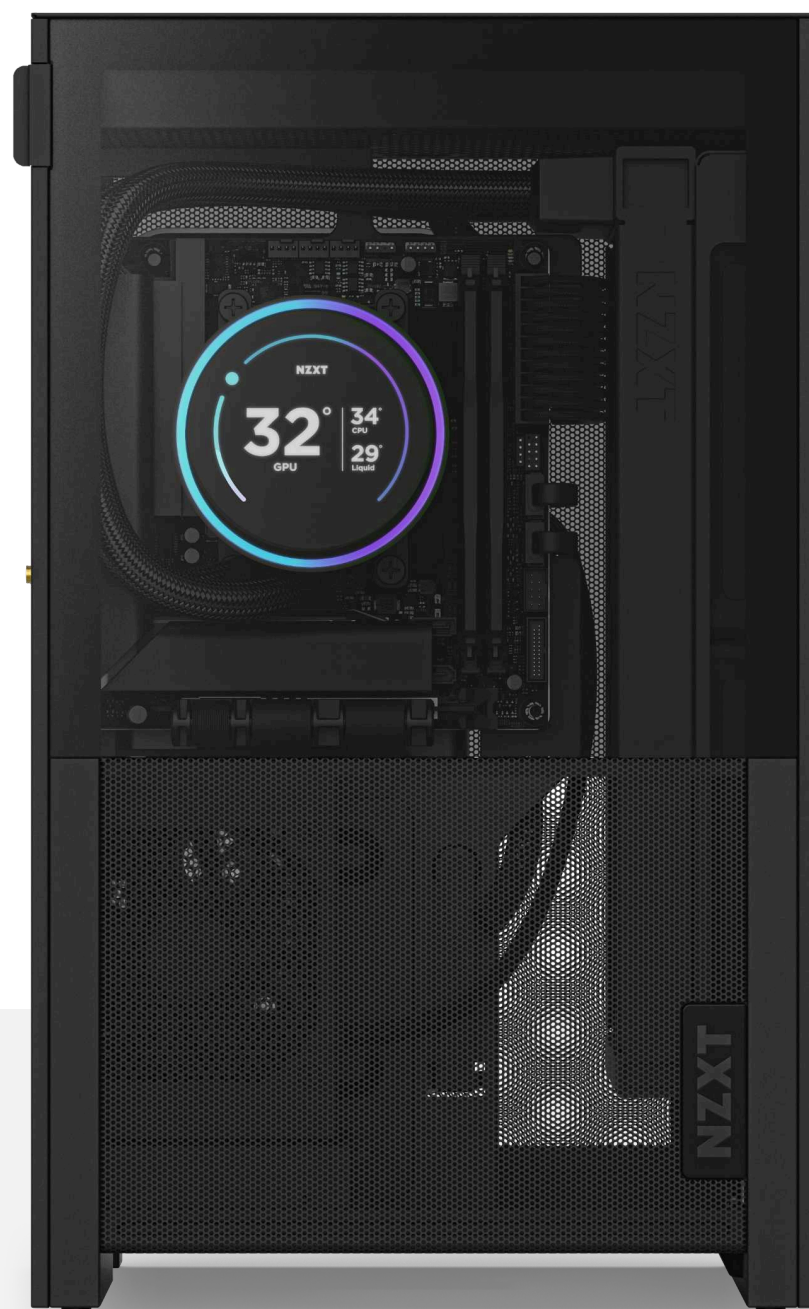

Mini-ITX SFF Case

# ABOUT THE PRODUCT

The H2 Flow is a compact 20.7 L vertical mini-ITX case designed for powerful small form factor builds. It supports GPUs up to 331 mm and liquid coolers up to 280 mm, with ultra-fine mesh panels for maximum airflow. A hybrid glass-and-mesh side panel puts your components on display while tool-less access and smart cable management keep building simple.

## HYBRID SIDE PANEL

A split side panel combines tempered glass to show off your components with mesh below to keep airflow strong.

Purpose-built to highlight NZXT Kraken AIO pump cap displays — like the Kraken Elite 280 RGB.

## LARGE GPU SUPPORT

Fits GPUs up to 331 mm, including many of today's most powerful cards like the RTX 50 Series.

## HIGH-AIRFLOW PANELS

Ultra-fine mesh maximizes airflow while filtering dust to keep components cool and clean.

## INCLUDES TWO 120 MM TOP FANS

Pre-installed F120Q fans (3-pin DC) deliver quiet, efficient cooling right out of the box.

## COMPACT 20.7 L VERTICAL SFF LAYOUT

Space-saving form factor supports high-performance components without taking over your desk.

## 280 MM RADIATOR CLEARANCE

Supports liquid coolers up to 280 mm to keep your CPU cool, quiet, and performing at its best.

## TOOL-LESS ACCESS

Panels pop off easily for quick cleaning, upgrades, and maintenance.

## CABLE MANAGEMENT

Built-in routing points and Velcro straps make it easy to keep cables neat, improving airflow and the look of your build.

## PCIe 5.0 RISER CABLE INCLUDED

Includes a PCIe 5.0 riser cable for vertical GPU installation, built to support next-gen graphics cards.
