# LED STRIP
LET IT SHINE!

To help you cover all the areas you want to bathe in RGB light, the COUGAR RGB LED Strips are longer than those offered by most competitors: with 15 LEDs per strip, you will make the best use of the available connectors. No corner will be left in the dark!
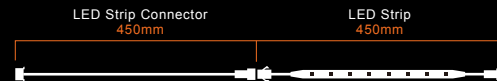

Incredible RGB Lighting Effects

When connected to the COUGAR Core Box, Core Box C or Core Box v2, the COUGAR RGB LED Strip will allow you to choose from 100 amazing visual effects that will give your case a new life. If you also have Vortex RGB fans, the effects on the fans and the LED strip can be wirelessly controlled and synchronized. With Core Box C or Core Box v2, connection to compatible motherboards' 5v RGB header for system-wide synchronization is also possible.

(Note: Both Core Box/Core Box C/Core Box v2 and the Vortex RGB fans are sold separately. This package includes only two COUGAR RGB LED Strips)

Convenient Installation

No more problems with adhesives. Every COUGAR RGB LED Strip is equipped with magnets that will make installation easy and quick!

LED Strip Connector
450mm

LED Strip
450mm

Support for 5V RGB Motherboard Connections

Connect the strips directly to the 5V RGB lighting connector of compatible ASUS, Asrock, Gigabyte or MSI motherboards.

(Please note: Only 5V RGB addressable lighting headers from compatible motherboards are supported; please do not connect the LED strip to a 12V connector)
