Highlights

Powerful 1200 Watt motor

Blend even the hardest ingredients with our strongest hand blender ever. Enjoy everything from homemade nut milk to frozen fruit smoothies in no time.

ProMix technology

Patented technology combines our strongest motor with a uniquely shaped blade unit and splash guard for optimal food movement, easy cleaning and no mess. Fast and smooth results every time.

Food processor attachment

Our high-capacity food processor accessory of 1'7 Litres is ideal for the whole family. Includes an S-blade for chopping big batches of food, and three additional discs with which you can slice (thick or thin), shred (thick or thin) or granulate (for mashed potatoes or cheese).

Compact chopper

Attach the compact chopper to chop onions and herbs, crush nuts and more. 0.5 L capacity for all the small tasks you need to perform while preparing your food.

SpeedTouch technology

Adjust your speed while blending for better control thanks to the intuitive speed trigger. Start slow to avoid splashing, then gradually press harder to steadily increase power.

One-touch button

A one-touch button releases the blending bar with one hand, so you can change attachments without putting down the blender or making a mess on the counter.

LED speed indicator

Our new speed indicator lets you prepare all your favourite foods with ease and precision.

Anti-splash blade guard

Don't worry about splashing. Thanks to ProMix Technology, our special blade guard stops splashes, large and small. The wave shape at the bottom of the blending bar traps less food on the blade for easy clean-up.

Whisk attachment

Attach the whisk accessory for fluffy whipped cream, silky mayonnaise or perfect pancake batter, or create your favourite salad dressings.
