

Sharkoon

**SKILLER
SGD20
GAMING DESK**

The SKILLER SGD20 provides the basis for every gaming setup that's worth seeing: Its particularly large tabletop is completely covered with a mouse mat to give the mouse extensive freedom of movement. In addition, several monitors can be placed next to the PC. The desk can be adjusted to three heights, while the steel frame construction allows a load of up to 100 kg.

Extensive Freedom of Movement

The SKILLER SGD20 has a mouse mat that covers the entire surface of the tabletop. No other mouse mat is therefore needed, and there is the greatest possible freedom of movement with the mouse. The mouse mat can be simply cleaned with a cloth.

Cleverly Designed

The very large tabletop of the SKILLER SGD20, measuring 180 cm in length and 85 cm in width, offers plenty of space for positioning several monitors next to the PC, keyboard, and mouse. The desk can be adjusted to three heights using the screws on the legs.

Smart Cable Management

Along the back of the SKILLER SGD20, there is a cable channel for effective cable management. There are also two cable openings in the tabletop, through which cables can be routed directly under the desk into the cable channel behind the desk. In the middle of the desk, there is an additional cable opening for the mouse and keyboard cables. These can thus be routed out of view.

Steadfast

The stable steel frame construction allows for a firm hold at all times. This is supported by the solid desk legs. To adjust for any unevenness, the leveling feet on the underside of the legs can be adjusted.

Strong

Overall, the SKILLER SGD20 can support a load of up to 100 kg. Therefore, in addition to a complete setup, a lot more can be put on the desk.
