## Safety Information

- The components included in this package are prone to damage from electrostatic discharge (ESD). Please adhere to the following instructions to ensure successful computer assembly.
- Ensure that all components are securely connected. Loose connections may cause the computer to not recognize a component or fail to start.
- Hold the motherboard by the edges to avoid touching sensitive components.
- It is recommended to wear an electrostatic discharge (ESD) wrist strap when handling the motherboard to prevent electrostatic damage. If an ESD wrist strap is not available, discharge yourself of static electricity by touching another metal object before handling the motherboard.
- Store the motherboard in an electrostatic shielding container or on an anti-static pad whenever the motherboard is not installed.
- Before turning on the computer, ensure that there are no loose screws or metal components on the motherboard or anywhere within the computer case.
- Do not boot the computer before installation is completed. This could cause permanent damage to the components as well as injury to the user.
- If you need help during any installation step, please consult a certified computer technician.
- Always turn off the power supply and unplug the power cord from the power outlet before installing or removing any computer component.
- Keep this user guide for future reference.
- Keep this motherboard away from humidity.
- Make sure that your electrical outlet provides the same voltage as is indicated on the PSU, before connecting the PSU to the electrical outlet.
- Place the power cord such a way that people can not step on it. Do not place anything over the power cord.
- All cautions and warnings on the motherboard should be noted.
- If any of the following situations arises, get the motherboard checked by service personnel:
  - Liquid has penetrated into the computer.
  - The motherboard has been exposed to moisture.
  - The motherboard does not work well or you can not get it work according to user guide.
  - The motherboard has been dropped and damaged.
  - The motherboard has obvious sign of breakage.
- Do not leave this motherboard in an environment above 60°C (140°F), it may damage the motherboard.

## Case stand-off notification

To prevent damage to the motherboard, any unnecessary mounting stand-off between the motherboard circuits and the computer case is prohibited. The Case standoff keep out zone signs will be marked on the backside of motherboard (as shown below) to serve as a warning to user.

## Avoid collision notification

Protective paint is printed around each screw hole to prevent parts from being scratched.

\* The illustration above is for reference only and may vary from the motherboard you purchased.

# Overview of Components

# CPU Socket

The AM5 socket is a modern CPU socket designed for AMD processors. It is a key component in contemporary computing systems, providing the foundation for powerful and efficient CPUs.

## Installing the CPU to the AM5 socket

The surface of the AM5 CPU has **two notches** and a **golden triangle** to assist in correctly lining up the CPU for motherboard placement. The golden triangle is the Pin 1 indicator.

To install the CPU, align the two notches on the AM5 socket with the two corresponding notches on the CPU. Please ensure that the gold triangle on the CPU serves as the PIN 1 indicator during the installation process.

Distance from the center of the CPU socket to the nearest DIMM slot.

 **Important**

- *When changing the processor, the system configuration could be cleared and reset BIOS to default values, due to the AM5 processor's architecture.*
- *Please ensure that the motherboard and power supply are turned off and always disconnect the power cord from the power outlet before installing or removing the CPU.*
- *Please retain the CPU protective cap after installing the processor. MSI will deal with Return Merchandise Authorization (RMA) requests if only the motherboard comes with the protective cap on the CPU socket.*
- *Whenever the CPU is not installed, always protect the CPU socket pins by covering the socket with the protective cap.*
- *The CPU should only fit in one orientation, so do not force it. Gently place the CPU into the socket without applying excessive pressure.*
- *Please handle the CPU by the edges only; avoid touching the pins or the surface of the CPU. Any damage to the pins can result in a malfunctioning CPU.*
- *When installing a CPU, always remember to install a CPU heatsink. A CPU heatsink is necessary to prevent overheating and maintain system stability.*
- *Please install the CPU cooler according to the manufacturer's instructions. Make sure it is securely a tight seal with the CPU and attached to the motherboard to ensure proper heat dissipation.*
- *Overheating can seriously damage the CPU and motherboard. Always make sure the cooling fans work properly to protect the CPU from overheating. Be sure to apply an even layer of thermal paste (or thermal tape) between the CPU and the heatsink to enhance heat dissipation.*
- *This motherboard is designed to support overclocking. Before attempting to overclock, please make sure that all other system components can tolerate overclocking. Any attempt to operate beyond product specifications is not recommended. MSI® does not guarantee the damages or risks caused by inadequate operation beyond product specifications.*

# DDR5 DIMM Slots

The DDR5 DIMM slot is a dedicated connector designed to accommodate DDR5 (Double Data Rate 5) memory modules. It represents the latest standard in computer memory, providing enhanced data transfer speeds and efficiency.

## Memory module installation recommendation

**Important**

Always insert memory modules in the **DIMMA2** slot first.

### **Important**

- The DIMM slots on this motherboard only have a single latch. Please be careful when installing or removing memory modules to avoid damaging the slots.
- Align the notch on the DDR5 module with the notch on the memory slot to ensure proper orientation. Do not force the module into the slot; it should slide in easily if properly aligned.
- To ensure system stability for Dual channel mode, memory modules must be of the same type, number and density.
- Some memory modules may operate at a lower frequency than the marked value when overclocking due to the memory frequency operates dependent on its Serial Presence Detect (SPD). Go to BIOS and find the **DRAM Speed** to set the memory frequency if you want to operate the memory at the marked or at a higher frequency.
- It is recommended to use a more efficient memory cooling system for full DIMMs installation or overclocking.
- The stability and compatibility of installed memory module depend on installed CPU and devices when overclocking.
- Please refer to [www.msi.com](http://www.msi.com) for more information on compatible memory.

## PCI\_E1~3: PCIe Expansion Slots

PCI Express (PCIe) expansion slots are used to connect add-on cards to the motherboard. These cards can provide additional functionality to your computer, such as graphics, networking, or storage.

### **Important**

- If you install a large and heavy graphics card, you need to use a tool such as **MSI Graphics Card Bolster** to support its weight to prevent deformation of the slot.
- For a single PCIe x16 expansion card installation with optimum performance, using the **PCI\_E1** slot is recommended.
- When adding or removing expansion cards, always turn off the power supply and unplug the power supply power cable from the power outlet. Read the expansion card's documentation to check for any necessary additional hardware or software changes.

## Installing a graphics card into PCI\_E1 slot

1. Ensure that the EZ PCIe Release Button is in the **locked** position. If it is unlocked, press the button to lock it.
2. Insert the graphics card into the PCIe slot.

## Removing a graphics card from PCI\_E1 slot

1. Ensure that the EZ PCIe Release Button is in the **unlocked** position. If it is locked, press the button to unlock it.
2. Gently pull the graphics card out of the PCIe slot.

## M2\_1~4: M.2 Slots (Key M)

The M.2 slot is a small, high-speed expansion slot on a motherboard. It can be used to connect an M.2 SSD, which is a type of solid-state drive that offers faster performance than traditional SATA SSDs.

Watch the video to learn how to Install M.2 SSD with Screwless M.2 Shield Frozr heatsink.

• <https://msi.gm/S7F5D000>

### Important

If your M.2 SSD equips its own heatsink, please note the following:

- Remove the M.2 plate or rubber cube in the M.2 slot before installing M.2 SSD. Do not re-install the heatsink supplied with the motherboard.
- Ensure that the M.2 SSD heatsink you use fits the size limits to prevent damage.

### M.2 SSD Heatsink Size Restrictions

If you need to purchase an additional heatsink, please refer to the diagram below to confirm the M.2 installation space dimensions. Please also consider the height of the installed PCIe expansion card when determining M.2 installation space.

## Installing M.2 module into M2\_1 slot

1. Press and hold the end button of Screwless M.2 Shield Frozr heatsink.

2. Slightly lift up the end part of Screwless M.2 Shield Frozr heatsink and move it forward to uninstall the heatsink.

3. Remove the protective film from the M.2 thermal pads on the M.2 plate.

4. If you want to install 22110 SSD, use the included **EZ M.2 Clip II Remover** to remove the **EZ M.2 Clip II** in the 2280 hole. And then secure the included M.2 plate screw in the 2280 hole. Skip this step if you install 2280 SSD.

5. Insert your M.2 SSD into the M.2 slot at a 30-degree angle.  
6. Rotate the EZ M.2 Clip to secure the M.2 SSD, or use the EZ M.2 Clip II, which automatically locks and secures the SSD.

7. Remove the protective films from the thermal pads under Screwless M.2 Shield Frozr heatsink.
8. Align the notches under Screwless M.2 Shield Frozr heatsink with the tenons, and then put the heatsink back in place.
9. Press the end side of Screwless M.2 Shield Frozr heatsink to lock it completely.

## Installing M.2 module into M2\_2/ M2\_3 slot

1. Loosen the screws of M.2 Shield Frozr heatsink.
2. Lift up the M.2 Shield Frozr heatsink and remove it.

3. If you install 2260 SSD, use the included **EZ M.2 Clip II Remover**. Place the included **EZ M.2 Clip II** in the slot, use the remover to screw it in by turning clockwise, and secure it. Skip this step if you install 2280 SSD.

4. Insert your M.2 SSD into the M.2 slot at a 30-degree angle.
5. Rotate the EZ M.2 Clip to secure the M.2 SSD, or use the EZ M.2 Clip II, which automatically locks and secures the SSD.

6. Remove the protective film from the thermal pad under the M.2 Shield Frozr heatsink.
7. Put the M.2 Shield Frozr heatsink back in place and secure it.

## Installing M.2 module into M2\_4 slot

1. Press and hold the end button of Screwless M.2 Shield Frozr heatsink.

2. Slightly lift up the end part of Screwless M.2 Shield Frozr heatsink and move it forward to uninstall the heatsink.

3. If you install 2260 SSD, use the included **EZ M.2 Clip II Remover**. Place the included **EZ M.2 Clip II** in the slot, use the remover to screw it in by turning clockwise, and secure it. Skip this step if you install 2280 SSD.

4. Insert your M.2 SSD into the M.2 slot at a 30-degree angle.
5. Rotate the EZ M.2 Clip to secure the M.2 SSD, or use the EZ M.2 Clip II, which automatically locks and secures the SSD.

6. Remove the protective films from the thermal pads under Screwless M.2 Shield Frozr heatsink.
7. Align the notches under Screwless M.2 Shield Frozr heatsink with the tenons, and then put the heatsink back in place.
8. Press the end side of Screwless M.2 Shield Frozr heatsink to lock it completely.

### Removing M.2 SSD using the EZ M.2 Clip II

To remove M.2 SSD from the EZ M.2 Clip II, gently push the spring head on the top of the EZ M.2 Clip II outward while simultaneously pulling the M.2 SSD out.

## SATA\_S1~S4: SATA 6Gb/s Connectors

These connectors are SATA 6Gb/s interface ports. Each connector can connect to one SATA device.

### Important

- Please do not fold the SATA cable at a 90-degree angle. Data loss may result during transmission otherwise.
- SATA cables have identical plugs on either sides of the cable. However, it is recommended that the flat connector be connected to the motherboard for space saving purposes.

## JAUD1: Front Audio Connector

This connector allows you to connect audio jacks on the front panel.

Pin	Signal Name	Pin	Signal Name
1	MIC L	2	Ground
3	MIC R	4	NC
5	Head Phone R	6	MIC Detection
7	SENSE_SEND	8	No Pin
9	Head Phone L	10	Head Phone Detection

# JFP1, JFP2: Front Panel Connectors

The JFP1 connector controls the power on, power reset, and the LEDs on your PC case/chassis. Power Switch/ Reset Switch headers allow you to connect power button/ reset button. Power LED header connects to LED light on the PC case, and HDD LED header indicates the activity of the hard disk. The JFP2 connector is for Buzzer and Speaker. For connecting the cables from your PC case to the correct pins on the motherboard, please refer to the following images.

## Important

Make sure to connect the Power LED and HDD LED cables to the corresponding positive and negative pins on the motherboard. Otherwise, the LEDs will not function properly.

## Using EZ Front Panel Cable

The **EZ Front Panel Cable** allows you to first connect and integrate the PC case's front panel connectors, making it easier to install into the **JFP1** connector. Attach **Power SW**, **Reset SW**, **Power LED (+ to +, - to -)**, and **HDD LED (+ to +, - to -)** to the matching pins on the Front Panel Cable, then plug the **EZ Front Panel Cable** into the **JFP1** connector.

# CPU\_PWR1~2, ATX\_PWR1, PCIE\_PWR1: Power Connectors

These power connectors allow you to connect an ATX power supply.

## CPU\_PWR1~2

Pin	Signal Name	Pin	Signal Name
1	Ground	2	Ground

### Important

Make sure that all the power cables are securely connected to a proper ATX power supply to ensure stable operation of the motherboard.

## JCI1: Chassis Intrusion Connector

This connector allows you to connect the chassis intrusion switch cable.

Normal  
(default)

Trigger the chassis  
intrusion event

### Using chassis intrusion detector

1. Connect the **JCI1** connector to the chassis intrusion switch/ sensor on the chassis.
2. Close the chassis cover.
3. Go to **BIOS > Security > Chassis Intrusion Configuration**.
4. Set **Chassis Intrusion** to **Enabled**.
5. Press **F10** to save and exit and then press the **Enter** key to select **Yes**.
6. Once the chassis cover is opened again, a warning message will be displayed on screen when the computer is turned on.

### Resetting the chassis intrusion warning

1. Go to **BIOS > Security > Chassis Intrusion Configuration**.
2. Set **Chassis Intrusion** to **Reset**.
3. Press **F10** to save and exit and then press the **Enter** key to select **Yes**.

## JOCFS1: Safe Boot Jumper

This jumper is used for Safe Boot. When this jumper is enabled, the system will boot with default settings and lower PCIe (from CPU) mode.

Normal (default)  
Boot with the saved  
BIOS settings.

Enabled  
Apply the BIOS default  
settings and lower PCIe  
(from CPU) mode for  
Safe Boot

## JUSBC1: USB Type-C® Front Panel Connector

This USB connector allows you to connect to the USB Type-C® ports on the front panel and support data transfer speeds of up to 20Gbps. It features a user-friendly design that ensures proper orientation when connecting the cable.

## JUSB3~4: USB 5Gbps Connectors

These USB connectors allow you to connect to USB ports on the chassis panel and supports data transfer speeds of up to 5Gbps.

Pin	Signal Name	Pin	Signal Name
1	Power	2	USB3_RX_DN
3	USB3_RX_DP	4	Ground
5	USB3_TX_C_DN	6	USB3_TX_C_DP

15	USB3_TX_C_DN	16	Ground
17	USB3_RX_DP	18	USB3_RX_DN
19	Power	20	No Pin

### Important

Note that the Power and Ground pins must be connected correctly to avoid possible damage.

## JUSB1~2: USB 2.0 Connectors

These connectors enable the connection of front-panel USB ports supporting speeds of up to 480 Mbit/s.

Pin	Signal Name	Pin	Signal Name
1	VCC	2	VCC
3	USB0-	4	USB1-
5	USB0+	6	USB1+
7	Ground	8	Ground
9	No Pin	10	NC

### Important

- Note that the VCC and Ground pins must be connected correctly to avoid possible damage.
- In order to recharge your iPad, iPhone and iPod through USB ports, please install MSI Center utility.

## JTPM1: TPM Module Connector

This connector is designed for a Trusted Platform Module (TPM) to enable secure storage of sensitive data and perform cryptographic operations that ensure the integrity of your system.

Pin	Signal Name	Pin	Signal Name
1	SPI Power	2	SPI Chip Select
3	Master In Slave Out (SPI Data)	4	Master Out Slave In (SPI Data)
5	Reserved	6	SPI Clock
7	Ground	8	SPI Reset
9	Reserved	10	No Pin
11	Reserved	12	Interrupt Request

### Important

The TPM module is not included and must be purchased separately.

## CPU\_FAN1, PUMP\_SYS1, SYS\_FAN1~6: Fan Connectors

Fan connectors can be divided into two categories: PWM Mode and DC Mode. PWM Mode fan connectors provide a constant 12V output and adjust fan speed with a speed control signal. DC Mode fan connectors control fan speed by changing voltage. Please refer to the following specification table for the fan connector mode of your motherboard.

You can control fans in **BIOS> HARDWARE MONITOR** panel. Enabling Smart Fan Mode will regulate fan speed based on CPU or system temperature. Disabling Smart Fan Mode will set the fan to full speed.

### Important

You can set DC or PWM in **HARDWARE MONITOR** panel to your fan type if your motherboard supports it. Make sure fans are working properly after switching the PWM/ DC mode.

### PWM Mode pin definition

Pin	Signal Name	Pin	Signal Name
1	Ground	2	+12V
3	Sense	4	Speed Control Signal

### DC Mode pin definition

Pin	Signal Name	Pin	Signal Name
1	Ground	2	Voltage Control
3	Sense	4	NC

### Fan specifications for fan connectors

Connector	Fan mode	Max. current	Max. power
CPU_FAN1	Auto mode	2A	24W
PUMP_SYS1	PWM mode	3A	36W
SYS_FAN1~6	Auto mode	1A	12W

### Important

The auto mode fan connectors can automatically detect PWM and DC modes.

## JBAT1: Clear CMOS (Reset BIOS) Jumper

There is CMOS memory onboard that is external powered from a battery located on the motherboard to save system configuration data. If you want to clear the system configuration, set the jumpers to clear the CMOS memory.

Keep Data  
(default)

Clear CMOS/  
Reset BIOS

## Resetting BIOS to default values

1. Power off the computer and unplug the power cord.
2. Use a jumper cap to short **JBAT1** for about 5-10 seconds.
3. Remove the jumper cap from **JBAT1**.
4. Plug the power cord and Power on the computer.

## JBCLK1~2: BCLK Frequency Jumpers

These jumpers are provided for overclocking enthusiasts to fine-tune the CPU Base Clock (BCLK). You can connect momentary switches to these jumpers for manual, real-time BCLK adjustment while the system is operating.

(Decrease Frequency)

JBCLK2

JBCLK1

(Increase Frequency)

### **Important**

- The overclocking results may vary depending on the installed CPU.
- Adjusting BCLK is an overclocking activity that may cause system instability or permanent damage, and it will void your product warranty.
- Ensure that your cooling system is adequate to handle the increased heat.
- If BCLK overclocking causes system instability or crashes, please clear CMOS to restore factory settings.

# JRGB1: RGB LED connector

The JRGB connector allows you to connect the 5050 RGB LED strips 12V.

Pin	Signal Name	Pin	Signal Name
1	+12V	2	G
3	R	4	B

## RGB LED Strip Connection

## RGB LED Fan Connection

### **Important**

- The JRGB connector supports up to 2 meters continuous 5050 RGB LED strips (12V/G/R/B) with the maximum power rating of 3A (12V).
- Always turn off the power supply and unplug the power cord from the power outlet before installing or removing the RGB LED strip.
- Please use MSI's software to control the extended LED strip.

# JARGB\_V2\_1~3: A-RAINBOW V2 (ARGB Gen2) LED connectors

The JARGB\_V2 connectors allow you to connect the ARGB Gen2 and the ARGB-based LED strips. The JARGB\_V2 connector supports up to 180 individually addressable RGB LEDs with maximum power rating of 3A (5V).

Pin	Signal Name	Pin	Signal Name
1	+5V	2	Data
3	No Pin	4	Ground

## Addressable RGB LED Strip Connection

## Addressable RGB LED Fan Connection

### CAUTION

Do not connect the wrong type of LED strips. The JRGB connector and the JARGB\_V2 connector provide different voltages, and connecting the ARGB 5V LED strip to the JRGB connector will result in damage to the LED strip.

### **Important**

- *If you connect the ARGB Gen1 and ARGB Gen2 LED strips into the same connector, it may cause some issues. Please do not mix the ARGB Gen1 LED and the ARGB Gen2 LED strips together.*
- *It is recommended that you install LED strips with the same specification to achieve the best effects.*
- *Always turn off the power supply and unplug the power cord from the power outlet before installing or removing the addressable RGB LED strip.*
- *Please use MSI's software to control the extended LED strip.*

## JAF\_2: EZ Conn-Header V2

This header allows you to connect the ARGB Gen1 and Gen2 LED strips, fans and USB 2.0 devices. It can also be used to connect MPG EZ120 ARGB fans.

Pin	Signal Name	Pin	Signal Name
1	Ground	2	5V
3	12V	4	DATA
5	Sense	6	Ground
7	Speed	8	N/A
9	Ground	10	USB 2.0+
11	+5VSB	12	USB 2.0-

## Addressable RGB LED Fan Connection

## MPG EZ120 ARGB Fan Connection

### **Important**

- The Fan-JAF1 Cable is included in the packaging of MPG EZ120 ARGB.
- JAF\_2 header is compatible with JAF\_1 header since pins 1 to 7 carry the same signals. MPG EZ120 ARGB can be connected to the JAF\_2 header.
- For more information on how to install MPG EZ120 ARGB, please refer to <https://msi.gm/S5035E56>.

# Onboard LEDs

## EZ Debug LED

These LEDs indicate the debug status of the motherboard.

LED Color	Status
Red ■	CPU is not detected or fail
Yellow ■	DRAM is not detected or fail
White □	GPU is not detected or fail
Green ■	Booting device is not detected or fail

## EZ Memory Detection LED

This LED indicates that the memory module's power is not detected. If any memory module loses power, this LED will light up.

## EZ Digi-Debug LED

The EZ Digi-Debug LED displays progress and error codes during and after POST. Refer to the Debug Code LED table for details.

Hexadecimal Character Table

Hexadecimal	0	1	2	3	4	5	6	7
LED display	0	1	2	3	4	5	6	7

## Recovery Progress Codes

F0	Recovery condition triggered by firmware (Auto recovery)
F1	Recovery condition triggered by user (Forced recovery)
F2	Recovery process started
F3	Recovery firmware image is found
F4	Recovery firmware image is loaded
F5 - F7	Reserved for future AMI progress codes

## Recovery Error Codes

F8	Recovery PPI is not available
F9	Recovery capsule is not found
FA	Invalid recovery capsule
FB - FF	Reserved for future AMI error codes

## ACPI States Codes

The following codes appear after booting and the operating system into ACPI modes.

01	System is entering S1 sleep state
02	System is entering S2 sleep state
03	System is entering S3 sleep state
04	System is entering S4 sleep state
05	System is entering S5 sleep state
10	System is waking up from the S1 sleep state
20	System is waking up from the S2 sleep state
30	System is waking up from the S3 sleep state
40	System is waking up from the S4 sleep state
AC	System has transitioned into ACPI mode. Interrupt controller is in PIC mode.
AA	System has transitioned into ACPI mode. Interrupt controller is in APIC mode.

# Installing OS, Drivers & MSI Center

Please download and update the latest utilities and drivers at [www.msi.com](http://www.msi.com)

## Installing Windows 11

1. Power on the computer.
2. Insert the Windows 11 installation disc/ USB into your computer.
3. Press the **Restart** button on the computer case.
4. Press **F11** key during the computer POST (Power-On Self Test) to get into Boot Menu.
5. Select the Windows 11 installation disc/USB from the Boot Menu.
6. Press any key if screen shows **Press any key to boot from CD or DVD...** message. If not, please skip this step.
7. Follow the instructions on the screen to install Windows 11.

## Installing Drivers with USB Drive

1. Start up your computer in Windows 11.
2. Insert MSI® USB Drive into the USB port.
3. You can see a **Disc Image file** which contains drivers and utilities in the USB drive. Double-click the file to open it.
4. Execute an application file named **DVDSetup**.
5. The installer will find and list all necessary drivers in the **Drivers/Software** tab.
6. Click the **Install** button in the lower-right corner of the window.
7. The drivers installation will then be in progress, after it has finished it will prompt you to restart.
8. Click **OK** button to finish.
9. Restart your computer.

# Installing Drivers with MSI Driver Utility Installer

## Important

- Some new network chips have not been natively supported by Windows 11. It is recommended that the **LAN driver** be installed before installing drivers with MSI Driver Utility Installer. Please refer to [www.msi.com](http://www.msi.com) to install the LAN driver for your motherboard.
  - The MSI Driver Utility Installer will only pop up once. If you cancel or close it during the process, please refer to the Live Update chapter of the MSI Center manual to install the drivers. You can also go to [www.msi.com](http://www.msi.com) to search your motherboard and download the drivers.
  - MSI Driver Utility Installer needs to be installed over the internet.
1. Start up your computer in Windows 11.
  2. Select **Start > Settings > Windows Update**, and then select **Check** for updates.
  3. MSI Driver Utility Installer will pop up automatically.

4. Select the **I have read and agree to the MSI Terms of Use** check box, and then click Next.

5. Check the **Select All** checkbox in the lower-left corner and click **Install** to install MSI Center and drivers. The installation progress will be shown at the bottom.

6. Once the progress has completed, click **Finish**.

## MSI Center

MSI Center is an application that helps you easily optimize game settings and smoothly use content creation softwares. It also allows you to control and synchronize LED light effects on PCs and other MSI products. With MSI Center, you can customize ideal modes, monitor system performance, and adjust fan speed.

### MSI Center User Guide

If you would like to know more information about MSI Center, please refer to <https://msi gm/S391169E>

or scan the QR code to access.

### **Important**

*Functions may vary depending on the product you have.*

# UEFI BIOS

MSI UEFI BIOS is compatible with UEFI (Unified Extensible Firmware Interface) architecture. UEFI has many new functions and advantages that traditional BIOS cannot achieve, and it will completely replace BIOS in the future. The MSI UEFI BIOS uses UEFI as the default boot mode to take full advantage of the new chipset's capabilities. However, it still has a CSM (Compatibility Support Module) mode to be compatible with older devices. That allows you to replace legacy devices with UEFI compatible devices during the transition.

## **Important**

*The term BIOS in this user guide refers to UEFI unless otherwise noted.*

## UEFI advantages

- Fast booting - UEFI can directly boot the operating system and save the BIOS self-test process. And also eliminates the time to switch to CSM mode during POST.
- Supports for hard drive partitions larger than 2 TB.
- Supports more than 4 primary partitions with a GUID Partition Table (GPT).
- Supports unlimited number of partitions.
- Supports full capabilities of new devices - new devices may not provide backward compatibility.
- Supports secure startup - UEFI can check the validity of the operating system to ensure that no malware tampers with the startup process.

## Incompatible UEFI cases

- **32-bit Windows operating system** - this motherboard supports only Windows 11 64-bit operating system.
- **Older graphics card** - the system will detect your graphics card. If you use older graphics cards, it may display a warning message **There is no GOP (Graphics Output protocol) support detected in this graphics card.**

## **Important**

*We recommend that you replace it with a graphics card supporting GOP/UEFI or use CPU with integrated graphics for having normal function.*

## BIOS Setup

The default settings offer the optimal performance for system stability in normal conditions. You should **always keep the default settings** to avoid possible system damage or failure booting unless you are familiar with BIOS.

### **Important**

- BIOS items are continuously updated for better system performance. Therefore, the description may be slightly different from the latest BIOS and should be for reference only. You could also refer to the **HELP** information panel in BIOS.
- The BIOS screens, options and settings will vary depending on the products you have.

## BIOS User Guide

If you'd like to know more instructions on setting up the BIOS, please refer to <https://msi.gm/S53FE767> or scan the QR code to access.

### **Important**

*The appearance of the BIOS user guide may differ based on your motherboard model. Please consult your motherboard's BIOS for specific settings and options.*

# Entering BIOS Setup

Press **Delete** key, when the **Press DEL key to enter Setup Menu, F11 to enter Boot Menu** message appears on the screen during the boot process.

## Function key

**+/-**: Increase / decrease the value

**Enter**: Select the item

**ESC**: Exit

**Tab**: Next selection

**Ctrl+F**: Enter Search menu

**F1**: General Help list

**F2**: Add/ Remove a favorite item

**F3**: Enter Favorites menu

**F4**: Enter CPU core center & memory center information menu

**F5**: Enter Hardware Monitor menu

**F6**: Load optimized defaults

**F7**: Switch between Advanced mode and EZ mode

**F8**: Load Overclocking Profile

**F9**: Save Overclocking Profile

**F10**: Save Change and Reset\*

**F12**: Take a screenshot and save it to USB flash drive (FAT/ FAT32 format only).

\* Pressing **F10** displays a confirmation message summarizing your changes. Select **Yes** or **No** to confirm.

## How to find the BIOS version?

After entering the BIOS, find the BIOS version in the information box.

## Resetting BIOS

You might need to restore the default BIOS setting to solve certain problems. You can use the following methods to reset the BIOS settings.

- Go to BIOS and press **F6** to load optimized defaults.
- Short the **Clear CMOS** jumper on the motherboard.
- Press the **Clear CMOS** button on the rear I/O panel. If your motherboard doesn't have this button, skip this step.

### **Important**

*Be sure the computer is off before clearing CMOS data. Please refer to the **Clear CMOS jumper/ button** section for resetting BIOS.*

## Updating BIOS

### Updating BIOS with M-FLASH

Before starting the M-Flash process, make sure you have:

- A USB flash drive with a capacity of 32GB or less that is formatted to FAT32.

### **Important**

*M-Flash only supports FAT32 format, and the USB flash drive should not exceed 32GB.*

- A computer with internet access.

Please follow the steps below to update BIOS:

1. Download the latest BIOS file from the MSI website that matches your motherboard model, and save it to the USB flash drive.
2. If your motherboard has a Multi-BIOS switch, switch to the target BIOS ROM.
3. Insert the USB flash drive into your motherboard's USB port.
4. Enter flash mode by either:
  - Rebooting and pressing **Ctrl + F5** during POST, then clicking **Yes** to reboot the system.
  - Rebooting and pressing **Del** during POST to enter BIOS, then clicking the M-FLASH button and clicking **Yes** to reboot.
5. Select a BIOS file from the **M-FLASH File** menu and press **Enter**.
6. When prompted by a File Check message, click **Yes** to start the BIOS update.

Once the update reaches 100%, the system will reboot automatically.

## Updating BIOS with MSI Center

Before updating:

- Ensure the LAN driver is installed, and the internet connection is working properly.
- Close all other applications before updating the BIOS.

To update BIOS:

1. Install and launch MSI Center, then go to **Support** page.
2. Select **Live Update** and click on **Advance** button.
3. Select the BIOS file and click on **Install** button.
4. The installation reminder will appear, then click the **Install** button.

The system will automatically restart to update the BIOS. Once the flashing process is complete, the system will restart.

## Updating BIOS with Flash BIOS Button

1. Download the latest BIOS file from the MSI website that matches your motherboard model.
2. Rename the BIOS file to **MSI.ROM**, and save it to the root directory of a USB flash device.
3. Connect the power supply to **CPU\_PWR1** and **ATX\_PWR1**. (You don't need to install the CPU and memory.)
4. Plug the USB flash device with the **MSI.ROM** file into the **Flash BIOS Port** on the rear I/O panel.
5. Press the **Flash BIOS Button** to start flashing the BIOS. The LED will start flashing to indicate the process has begun.

The LED will turn off when the process is complete.

## FCC-B Radio Frequency Interference Statement

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and radiates radio frequency energy, and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

### NOTE

- The changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.
- Shield interface cables and AC power cord, if any, must be used in order to comply with the emission limits.

## FCC Conditions

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

- This device may not cause harmful interference.
- This device must accept any interference received, including interference that may cause undesired operation.

## CE Conformity

Products bearing the CE marking comply with one or more of the following EU Directives as may be applicable:

- RED 2014/53/EU
- Low Voltage Directive 2014/35/EU
- EMC Directive 2014/30/EU
- RoHS Directive 2011/65/EU
- Implementing measure Directive 2009/125/EC of ESPR Regulation (EU) 2024/1781

Compliance with these directives is assessed using applicable European Harmonized Standards.

The point of contact for regulatory matters is MSI-Europe: Eindhoven 5706 5692 ER Son, the Netherlands.

## Products with Radio Functionality (EMF)

This product incorporates a radio transmitting and receiving device. For computers in normal use, a separation distance of 20 cm ensures that radio frequency exposure levels comply with EU requirements. Products designed to be operated at closer proximities, such as tablet computers, comply with applicable EU requirements in typical operating positions. Products can be operated without maintaining a separation distance unless otherwise indicated in instructions specific to the product.

## Restrictions for Products with Radio Functionality

### WLAN 5150-5350 MHz:

The WiFi operating in the band 5150-5350 MHz shall be restricted to indoor use in the European Union.

### WLAN 7:

- a. Low Power Indoor (LPI) Wi-Fi 5.945-6.425 GHz devices:

The device is restricted to indoor use only when operating in the 5945 to 6425 MHz frequency range in the European Union.

- b. Very Low Power (VLP) Wi-Fi 5.945-6.425 GHz devices (portable devices):

The device is not permitted to be used on Unmanned Aircraft Systems (UAS) when operating in the 5945 to 6425 MHz frequency range in the European Union.

## Wireless Radio Use

This device is restricted to indoor use when operating in the 2.4GHz, 5GHz, 6GHz frequency band.

Cet appareil doit être utilisé à l'intérieur.

당해 무선설비는 운용중 전파혼신 가능성이 있음.

この製品は、周波数帯域 2.4GHz, 5GHz, 6GHz で動作しているときは、屋内においてのみ使用可能です。

### NCC無線設備警告聲明

工作頻率2.4GHz, 5GHz, 6GHz該頻段限於室內使用。

經型式認證合格之低功率射頻電機，非經許可，公司、商號或使用者均不得擅自變更頻率、加大功率或變更原設計之特性及功能。

低功率射頻電機之使用不得影響飛航安全及干擾合法通信；經發現有干擾現象時，應立即停用，並改善至無干擾時方得繼續使用。前項合法通信，指依電信法規定作業之無線電通信。低功率射頻電機須忍受合法通信或工業、科學及醫療用電波輻射性電機設備之干擾。

## Compliance Statement of Innovation, Science and Economic Development Canada (ISED)

This device complies with with Innovation, Science and Economic Development Canada's licence-exempt RSS(s). Operation is subject to the following two conditions:

(1) this device may not cause interference, and (2) this device must accept any interference, including interference that may cause undesired operation of the device.

Operation in the band 5150-5250 MHz is only for indoor use to reduce the potential for harmful interference to co-channel mobile satellite systems.

# Battery Information

## European Union:

Batteries, battery packs, and accumulators should not be disposed of as unsorted household waste. Please use the public collection system to return, recycle, or treat them in compliance with the local regulations.

## BSMI:

廢電池請回收

For better environmental protection, waste batteries should be collected separately for recycling or special disposal.

## California, USA:

The button cell battery may contain perchlorate material and requires special handling when recycled or disposed of in California.

For further information please visit:

<https://dtsc.ca.gov/perchlorate/>

## ⚠ WARNING

- **INGESTION HAZARD:** This product contains a button cell or coin battery.
- **DEATH** or serious injury can occur if ingested.
- A swallowed button cell or coin battery can cause **Internal Chemical Burns** in as little as **2 hours**.
- **KEEP** new and used batteries **OUT OF REACH OF CHILDREN**
- **Seek immediate medical attention** if a battery is suspected to be swallowed or inserted inside any part of the body.

- Remove and immediately recycle or dispose of used batteries according to local regulations and keep away from children. Do NOT dispose of batteries in household trash or incinerate.
- Even used batteries may cause severe injury or death. Call a local poison control center for treatment information.
- Battery type: CR2032
- Battery voltage: 3V
- Non-rechargeable batteries are not to be recharged.
- Do not force discharge, recharge, disassemble, heat above (manufacturer's specified temperature rating) or incinerate. Doing so may result in injury due to venting, leakage or explosion resulting in chemical burns.
- This product contains an irreplaceable battery.
- This icon indicates that a swallowed button battery can cause serious injury or death. Please keep batteries out of sight or reach of children.

## Chemical Substances Information
