Fits with every interior perfectly

- Ultimate flexibility in placement
- Easy to cut. For maximum freedom
- Vary your ambience with coloured light
- Just the right amount of light

PHILIPS

Highlights

Control from smart devices

Simply sync your lights to your existing Philips hue bridge. Once that is done, you can control your lights wirelessly from anywhere in your house. Be it from the living room, the dining table or from your bedroom, your smart device can control any light connected to the bridge.

Safety and security at home

Make it look like you are at home even when you are away. Set scheduled alarms or use timers to turn your lights on and off at fixed or random times. With online access, you can also control your home lighting directly via the app on your smart device. Enable geofencing in the app and your lights will automatically turn on or off when you enter or leave the house. Convenient and reassuring - wherever you are.

Create your own light settings

Use your favourite picture to generate the perfect colour scene for special occasions. Go

back in time and relive those moments by uploading your own picture and tuning the lights accordingly. Add up to 50 lights to every setting, and recall with a simple tap of the finger.

Timer function

The timer function not only lets you pre-set what time your Hue product comes on, for light when you arrive home in the evening, but also lets you change your lights gradually over time. Use it to turn your Hue product into your wake-up light. Pre-set it to increase the brightness gradually to bring you out of your sleep softly and gently compared with the sudden beep or ring of a conventional alarm clock. At night, you can pre-set the timer to turn your lights off gradually to help you fall asleep naturally.

Light dynamics

The hue ecosystem is fully open for developers. There are an ever-growing number of applications being developed for hue within this community. This has resulted in creative and dynamic lighting schemes opening possibilities of syncing your lights to your favourite music, to get the party kicking.

Adheres to any solid surface

Bend, shape and fix your Hue LightStrips to highlight furniture and create complete new light effects. Thanks to the integrated adhesive tape of the Hue LightStrips, it's easy to install the product anywhere and on any piece of furniture.

Cut to size

The Hue LightStrips bring complete design freedom to your home lighting. For added convenience, these flexible 2-m strips come with cutting marks that help to guide you when you are cutting to size to suit your application.

Up to 16 million colours

Choose from 16 million colours to match your light to the moment. Add accents to your home. Light a space with a splash of colour. Or wash your walls with stunning shades.
