Highlights

20 hot and iced drinks

Our 20 recipes range from warming drinks like espresso, milky lattes and cappuccinos, right through to cooling iced coffees. With the Philips fully automatic coffee machine, we have calibrated our brewing system so even iced coffees have the same delicious flavour as hot drinks.

100% ceramic grinders

Bring out the full flavour of your beans with our hard-wearing ceramic grinder. Fine-tune the grind size using one of 12 settings, from fine to coarse.

AquaClean filter

Brew up to 5000 cups without having to descale using an AquaClean filter. It purifies water before brewing begins so your coffee tastes more flavoursome.

LatteGo milk system

With the Philips automatic coffee machine, our powerful cyclonic frothing technology lets you create silky-smooth milk froth the touch of a button, even with plant-based milk alternatives.

Perfect temperature and aroma

Our Aroma Extract system finds the ideal balance between temperature and aroma by keeping the water temperature between 90°C and 98°C, all while regulating the water flow rate.

Eco Settings

Use one of five Eco Settings to reduce water and energy consumption, without compromising on coffee quality. Our 5500 series allows you to dim the main and cup lights earlier than the default time, use less water while rinsing, switch to standby mode more quickly or dim brightness.

QuickStart

No more waiting for your espresso machine to warm up. Our QuickStart function allows you to power up your machine and brew a coffee right away. Your Philips fully automatic coffee maker will heat up based on the selected recipe, so you can enjoy your coffee without the wait.

Add an extra shot

Enjoy more flavour without the bitterness by using our extra shot function. You can add it to any of our coffee recipes, except when using the pre-ground function.

Machine support on HomeID

Learn the ins and outs of your machine and discover new cafe-style coffee recipes on our HomeID app.

Specifications

Safety feature

Automatic shut-off timer: Yes
Safety certification: Yes

Technical specifications

Energy Efficiency rating: Class A
Power: 1500 W
Voltage: 230 V
Frequency: 50 Hz
Number in pack: 1

Weight and Dimensions

Product Length: 433 mm
Product Width: 246 mm
Product Height: 371 mm
Product Weight: 8 kg
Package Length: 491.5 mm
Package Width: 287.5 mm
Package Height: 487 mm
Package Weight: 10-12.5 kg
