

# M Universal Cable Sock Self Wrapping

EAN:7350073733224

## Specification:

|                        |                                                                                                                                                                                         |
|------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Working temperature:   | -50°C-+ 150°C                                                                                                                                                                           |
| Melting point:         | 240±10°C                                                                                                                                                                                |
| Flammability:          | 8s6853 lb UL94 V-0 FMVSS 302                                                                                                                                                            |
| Overlap:               | 50%                                                                                                                                                                                     |
| Wear-resisting level   | ISO6722 , Load 7N , Number of scratches ≥3000 times , high wear resistance.                                                                                                             |
| Application:           | It is widely used in electrical wiring, cables, wiring harness and hoses for high-speed trains, cars, automation equipment, instruments, and especially for irregularly wiring harness. |
| Certificate:           | RoHS                                                                                                                                                                                    |
| Monofilament diameter: | 0.25mm                                                                                                                                                                                  |
| Colour:                | White                                                                                                                                                                                   |
| Material:              | Polyester                                                                                                                                                                               |
| Safety:                | Fire retardant material                                                                                                                                                                 |
| Width:                 | 10 mm diameter                                                                                                                                                                          |
| Length:                | 25m                                                                                                                                                                                     |
