# Highlights

## Open-ear true wireless fit

The open-ear design of these earbuds means there's no need to play around with different-sized ear tips. Instead, comfortable ear hooks loop around your ears, and a rubberised anchor at the end of each hook gently grips under the back of your ear for extra security and a fit that won't fail.

## Air conduction

Music, audiobooks, podcasts, workout playlist—you'll enjoy good sound with decent bass whatever you're listening to! Each earbud sits securely on the curve of your outer ear and precision drivers direct sound into your ear canal without sealing it, so you'll hear your surroundings while you listen.

## IP55 dust and water resistant

Walk in the woods. Run in the rain. An IP55 rating means these open-ear buds don't mind sweat, moisture or dust—so they'll never give you an excuse to stay on the sofa! If you're getting your move on outside, a running light keeps you visible.

## Up to 28 hrs (7 + 21)

You get 7 hours of play time from a full charge, and an extra 21 hours from the case. If you need a quick boost, pop the earbuds back in the case for just 5 minutes to get an extra hour. It takes 2 hours to recharge the earbuds fully, and mono mode lets you use one earbud at a time while the other one charges. The case can be charged via USB-C.

## On-ear touch controls

There are handy on-ear touch controls for music playback, volume and calls. Prefer to use the left or right earbud? You can customise how these controls are set up via the Philips Headphones companion app.

## Solid Bluetooth connection

Advanced Bluetooth connectivity gives you a more stable connection for seamless streaming, and you can connect to two Bluetooth devices (iOS or Android) at the same time. Enjoy that playlist or listen uninterrupted to your favourite podcast without annoying dips in the sound.

## Clearer calls on the go

When you're on a call, beamforming mics accurately pick up the sound of your voice while an AI algorithm removes background noise from the world around you. The person you're speaking to will hear you, and not the traffic or the chatter of the people standing next to you!

## Philips Headphones app

Use our companion app to soundtrack more than your workouts! Select Soundscapes to listen to nature sounds or instrumental sound baths—perfect for post-workout cooldowns. Or listen to binaural beats to aid relaxation or focus: you can listen to the beats on their own, mixed with your music or as a background sound in a soundscape.
